Dear Erhard

LETTER OF COMMENDATION

I am delighted to submit this letter of commendation for your commitment and business ethic in developing our company's web site, namely, www.tenstat.com.

We recently embarked on this journey to develop a world class web based business which in turn would offer a world class service within the property development and rental silo. However, it was not long before we got burned, as the initial company entrusted with our web development did not understand our core business principals, as such, delivered an inferior product in which we were very disappointed, notwithstanding 3 months wasted waiting for the final test product to be delivered.

Entrusting our web development to Ernic Innovative Technologies, was the best decision we could have made, albeit, sceptical at first, due to our mistrusting bias derived from our first web development experience. Your commitment, professionalism and comprehensive understanding of our core business values, are in my opinion the key to you delivering our world class web site surpassing our expectations, competing amongst the best listed on the internet to date. Thank you!

Regards

André van Biljon
CEO
